

Resettlement Awards Granted to Date by County and Income Level

The below data are derived from documentation obtained from the Christie Administration, which we can provide upon request. "LMI" refers to "low and moderate income" households, which typically indicates households earning between \$50,000 - \$70,000 per family of four (varies by county). "Non-LMI" refers to households earning above that amount; there is no upper limit on the income level that a household can earn and be eligible for the program.

Do not hesitate to call us with questions regarding the below.

Resettlement Awards Granted as of 9/26/2013 (Total Number of Awards by LMI Status)				Resettlement Awards as of 9/26/2013 (% of Awards Granted by LMI Status)
